May 2026

VIVEKANANDA COLLEGE OF ENGINEERING & TECHNOLOGY

[A Unit of Vivekananda Vidyavardhaka Sangha, Puttur (R)]

Affiliated to Visvesvaraya Technological University and Approved by AICTE New Delhi & Govt. of Karnataka

Nehru Nagara, Puttur – 574 203, DK, Karnataka, India

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS

CERTIFICATE

Certified that the internship work entitled “**Internship Title**” at **Company Name** was successfully completed by **Student Name** bearing USN **USN**, a bonafide student of **Vivekananda College of Engineering & Technology Puttur**, in partial fulfillment of the requirements for the award of **Master of Computer Applications (MCA)** degree under **Visvesvaraya Technological University, Belagavi** for the academic year 2025-26.

It is hereby confirmed that all corrections and suggestions recommended during the Internal Assessment have been duly incorporated into the report, which has been deposited in the departmental library. The internship report meets the academic standards and requirements for the Internship/Professional practice component prescribed for this degree.

TO WHOMSOEVER IT MAY CONCERN

This is to certify that **Student Name (USN)** , a student of Final Year MCA at Vivekananda College of Engineering & Technology, Puttur, has worked on the internship titled **"Internship Title"**

This academic internship was carried out from 2nd February 2026 to 16th May 2026. During his/her tenure with us, he/she demonstrated strong logical and analytical skills, and his/her conduct was found to be good.

EXECUTIVE SUMMARY & ACKNOWLEDGEMENT

For thirteen weeks from 02/02/2026 to 16/05/2026, I did an internship at Company Name. Explain briefly about company services and products.

I take this opportunity to express my deep heartfelt gratitude to all those people who have helped me in the successful completion of the internship work.

I am deeply grateful to **Supervisor Name**, my supervisor at Company Name. He/She provided timely and valuable guidance, connecting me with field experts who offered extensive insights on various practical matters. He/She consistently provided prompt feedback on my work, assisting me in effectively presenting my ideas and accomplishments.

First and foremost, I would like to express my sincere gratitude towards our beloved guide **Guide Name**, Designation, for providing excellent guidance, encouragement and inspiration throughout the internship work. Without his/her invaluable guidance, this work would never have been a successful one.

I would like to express my sincere gratitude to Director of the Department of Master of Computer Applications (MCA), **Dr. Jothimani K** for her guidance and inspiration.

I have great pleasure in expressing my profound gratitude to our respected Principal **Dr. Mahesh Prasanna K** for his constant support and encouragement.

I would like to thank our Management for providing all the facilities and a proper environment to work in the college campus.

I am thankful to all the teaching and non-teaching staff members of Master of Computer Applications (MCA) Department for their help and needed support rendered throughout the project.

Abstract

The internship, titled Data Science and AI/ML – MakeX, focuses on applying smart computing technologies to solve real-world problems. With the rapid growth of machine learning and data analysis techniques, sectors such as agriculture, healthcare, and environmental management have seen significant improvements in efficiency and decision-making. The main objective of the internship was to gain hands-on experience in Python programming, data handling, and machine learning concepts. Libraries like NumPy, Pandas, and Matplotlib were used for data preprocessing, analysis, and visualization. As part of the internship, a project titled Plant Leaf Disease Detection System was developed. The system utilizes image processing and deep learning techniques to identify diseases in plant leaves. A Convolutional Neural Network (CNN) model was implemented to classify leaf images as either healthy or diseased. The project included stages such as data collection, preprocessing, model training, evaluation, and deployment. The trained model was then integrated into a user-friendly interface to deliver real-time predictions. Overall, the internship improved technical knowledge, enhanced problem-solving abilities, and provided a better understanding of machine learning applications in agriculture.

Keywords: Machine Learning, Deep Learning, Computer Vision, CNN, Image Processing, Agriculture

List of Figures

List of Tables

4.1	Week-wise Work Progress	6
-----	-----------------------------------	---

Chapter 1

Introduction

1.1 Introduction

Internship topic, Purpose of project, Importance of your work

1.2 Company Profile

Company overview with the following points

Name of the Company: Company Name

Address: Address of the company

Contact Numbers: contact number

Email: mail id

Services/products:

Technologies used:

Major projects:

Chapter 2

Software Requirements Specification

2.1 Functional Requirements

Write what system does: Features of system, for examples: User login, Data processing, Message transmission and so on..

2.2 Non Functional Requirements

Write system quality aspects: Performance, Security, Scalability, Reliability

2.3 Hardware requirements

- **Processor:** Mention
- **RAM:** Mention
- **Hard Disk:** Mention
- and so on

2.4 Software requirements

- **Operating System:** Mention
- **Coding Language:** Mention
- **Tool:** Mention
- **Editor:** Mention
- **Libraries:** Mention
- and so on

2.5 Browser compatibility

Brief explanation about browser compatibility

- **Supported Browsers:** Mention

2.6 UI Design

Mention UI design languages with explanations in brief (Design approach and Screens layout)

2.7 Security Measures

- **Authentication:** Explain
- **Data protection:** Explain

Chapter 3

Project Carried Out

3.1 Project Objectives

Write atleast 3 objectives

3.2 Methodology

explain Approach used to complete the project, Development process (which model used to develop...,) The figure 3.2 represents workflow forexplain

3.3 Modules Developed

List and explain each module which includes (Module name, Function of module, Input and Output)

3.4 Challenges Faced

explain technical difficulties,debugging issues,learning challenges

3.5 Solutions Implemented

explain how problems were solved and improvements made

3.6 Coding

Add important coding part here.....

Chapter 4

Results and Conclusion

4.1 Project Assessment and Outcomes

Figure 4.1 depicts theexplain

Also Add screenshots of main pages/modules(atleast 2 to 3 working modules and explain figures in 2 to 3 lines)

4.2 Personal Development

4.2.1 Technical Skill Development

explain New technologies, tools, and concepts learned and Practical implementation knowledge

4.2.2 Problem-Solving and Analytical Skills

explain Ability to identify issues,Debugging and logical thinking improvement

4.2.3 Communication Skills

explain Interaction with mentors and team, Improvement in technical explanation

4.2.4 Teamwork and Collaboration

explain Working in a group, Coordination and cooperation

4.2.5 Time Management and Work Discipline

explain Task planning and execution with below table

The table 4.1 representssummarize...

Table 4.1: **Week-wise Work Progress**

Week	Work Progress
1	...
2	...
