TECHNICAL SEMINAR -MMC452

Presentation Guidelines

1. Slide Number and Content:

- Aim for a total of 10 slides, including a title slide and a bibliography/reference slide.
- Each slide should focus on key points or sections of your seminar topic.

2. Font Size and Type:

- Use a consistent font throughout the presentation.
- Recommended font: Arial, Calibri, or Times New Roman.
- Font size for body text: 24 points.
- Font size for headings: 32-36 points.

3. Text Alignment:

- Text should be justified (aligned to both the left and right margins) for a clean and professional look.

4. Slide Layout:

- Avoid paragraphs; use bullet points or concise phrases to convey information.
- Maintain a balanced layout with adequate white space for clarity.

5. Visuals (Diagrams, Tables, Charts):

- Include diagrams, tables, and charts where appropriate to illustrate key concepts.
- Ensure visuals are clear, labeled (with captions), and easy to understand.
- Use high-resolution images and avoid overcrowding the slide with too much visual content.

6. Slide Content Guidelines:

- **Title Slide:** Seminar title, your name, usn, date, guide name and designation.
- **Introduction Slide:** Overview of the seminar topic and its relevance.
- **Main Content Slides:** Divided logically into sections/topics.
- **Conclusion Slide:** Summarize key points and conclusions.
- **Bibliography/Reference Slide:** List of all sources cited in a consistent format (APA, MLA, etc.).
